Endoproteinase Lys-C

Cat. No.:	HY-P3208
CAS No.:	72561-05-8
Target:	Others
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

Endoproteinase Lys-C

BIOLOGICAL ACTIVITY

Description	Endoproteinase Lys-C is a protease that cleaves proteins on the C-terminal side of lysine residues and is commonly used for protein sequencing ^[1] .
In Vitro	<p>This product can be used for: 1) protein sequence analysis; 2) synthesis of lysine-related derivatives.</p> <p>Protocol</p> <p>This product can be directly used for protein enzyme digestion. The recommended enzyme digestion ratio is 1:50-1:200, and the enzyme digestion should be performed at 37 °C overnight.</p> <p>Notes</p> <p>1) The optimal reaction pH of this product is 9.0-9.5, and the optimal reaction temperature is 30-37 °C. It can still maintain high enzyme activity in the presence of 4 M urea or 0.1% SDS.</p> <p>2) Buffer: 20 mM Tris-HCl, pH=8.0.</p> <p>3) Do not freeze and thaw repeatedly.</p> <p>MCE has not independently confirmed the accuracy of these methods. They are for reference only.</p>
