Anti-Mouse/Rat/Human LRP1/CD91 Antibody (11H4)

| | |
|-----------|---|
| Cat. No.: | HY-P990202 |
| Target: | Others |
| Pathway: | Others |
| Storage: | Please store the product under the recommended conditions in the Certificate of Analysis. |

BIOLOGICAL ACTIVITY

| | |
|--------------------|---|
| Description | Anti-Mouse/Rat/Human LRP1/CD91 Antibody (11H4) is a mouse-derived IgG1, κ type antibody inhibitor, targeting to mouse/rat/human LRP1/CD91. |
| In Vitro | <p>The antibody framework is stable, specific and adaptable, and has the ability to bind both antigens and endogenous immune receptors. Monoclonal antibodies have several derivatives, including bispecific antibodies, antibody-drug conjugates, and antibody fragments, and have significant effects in fields such as immunology and oncology. When designing inhibitory antibodies, considerations include identification of antigen-specific variable regions, choice of expression system, use of multispecific formats, and antibody derivatives based on fragmentation, oligomerization, or conjugation with other functional moieties^[1].</p> <p>MCE has not independently confirmed the accuracy of these methods. They are for reference only.</p> |
