

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

## Ansuvimab

Cat. No.:	HY-P99337
CAS No.:	2375952-29-5
Target:	Filovirus
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Ansuvimab (Ansuvimab-zyk) is a recombinant human monoclonal IgG1 antibody that exhibits antiviral activity against Zaire ebolavirus. Ansuvimab binds to the glycoprotein on Zaire ebolavirus to block its entry into host cells <sup>[1]</sup> .
<b>IC<sub>50</sub> &amp; Target</b>	Zaire ebolavirus <sup>[1]</sup>
<b>In Vitro</b>	Ansuvimab blocks binding between the Ebola virus glycoprotein (GP) and the Niemann-Pick C1 receptor by binding to the LEIKKPDGS epitope located in the receptor binding site of the GP1 subunit of GP <sup>[1]</sup> . Ansuvimab mediates antibody-dependent cellular cytotoxicity (ADCC) against GP-transfected target cells, with maximal activity at the concentration of 0.03 µg/mL <sup>[2]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
<b>In Vivo</b>	Ansuvimab results in all macaques surviving after exposure to a lethal dose of Ebola virus in on day 0 <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
