## Tuvonralimab

Cat. No.:	HY-P99540
CAS No.:	2417649-44-4
Target:	PD-1/PD-L1; CTLA-4
Pathway:	Immunology/Inflammation
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Tuvonralimab (PSB-205; QL1706) is a dual immune checkpoint blockade containing a mixture of anti-PD-1 IgG4 and anti-CTLA-4 IgG1 antibodies, Iparomlimab and Tuvonralimab <sup>[1]</sup> .
<b>In Vitro</b>	Tuvonralimab contains mutations for heavy and light chain pairing (HC mutations K147D/F170C/V173C/C220G/R255K/D399R/K409E; light chain mutations S131K/Q160C/S162C/C214S), but not for the generation of a bispecific antibody. The final drug substance is a mixture of two monospecific IgGs, Iparomlimab and Tuvonralimab. The two antibodies are produced from the same cell line, with the mutations within Tuvonralimab ensuring efficient pairing of the correct chains. Iparomlimab contains no mutations <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
