Tozorakimab

Cat. No.:	HY-P99550
CAS No.:	2376858-66-9
Target:	Interleukin Related
Pathway:	Immunology/Inflammation
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Tozorakimab (MEDI-3506) is a human immunoglobulin G1 monoclonal antibody targeting interleukin-33. Tozorakimab reduces inflammation and epithelial dysfunction. Tozorakimab can be used to research chronic obstructive pulmonary disease ^[1] .
In Vivo	Tozorakimab (0.1-10 mg/kg, i.p., once time) inhibits IL-5 levels in bronchoalveolar lavage fluid of humanized IL-33 genetically modified mice in dose-dependent manner ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
