Foravirumab

Cat. No.:	HY-P99624
CAS No.:	944548-38-3
Target:	RABV
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Foravirumab (CR4098) is a monoclonal antibody against rabies virus glycoprotein antigenic site III ^[1] .
In Vitro	Foravirumab (CR4098) recognizes epitopes localized in antigenic site III. Foravirumab still binds to the mutated glycoprotein (N336D) expressed on PER.C6 cells. Foravirumab shows similar neutralizing potency and breadth as CR57, and neutralizes CR57 escape mutants ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
In Vivo	In Syrian hamster bearing natural rabies virus, Foravirumab (CR4098; 10, 20, and 40 IU/kg) provides protection against the lethal natural rabies virus infection ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
