Methyl 3-oxopentanoate

| | |
|--------------------|--|
| Cat. No.: | HY-W010394 |
| CAS No.: | 30414-53-0 |
| Molecular Formula: | C ₆ H ₁₀ O ₃ |
| Molecular Weight: | 130.14 |
| Target: | Biochemical Assay Reagents |
| Pathway: | Others |
| Storage: | Pure form -20°C 3 years 4°C 2 years In solvent -80°C 6 months -20°C 1 month |

BIOLOGICAL ACTIVITY

Description

Methyl 3-oxopentanoate, which is also known as diethyl acetylmalonate or MEAM, Methyl 3-oxopentanoate is commonly used as a building block for the synthesis of various organic compounds, including pharmaceuticals, agrochemicals, and flavorings, and it can also be used as a reagent in organic chemical reactions, especially the formation of carbon-carbon bonds through malonate synthesis, the researchers also investigated the potential use of Methyl 3-oxopentanoate in the development of chiral auxiliaries that can aid in the selection of Controlling the stereochemistry of chemical reactions.

In Vitro

Methyl 3-oxopentanoate is a biochemical reagent that can be used as a biological material or organic compound for life science related research.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
