Cholesteryl n-butyrate

Cat. No.:	HY-W013122
CAS No.:	521-13-1
Molecular Formula:	C ₃₁ H ₅₂ O ₂
Molecular Weight:	456.76
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Store at room temperature

BIOLOGICAL ACTIVITY

Description	Cholesteryl n-butyrate is a compound belonging to the class of esters. It is a cholesterol ester commonly found in animal and plant sources. Cholesteryl n-butyrate is composed of two naturally occurring substances, cholesteryl alcohol and butyric acid. The combination of the two creates a stable compound that can be used in a variety of industrial and biomedical settings. Cholesteryl n-butyrate is commonly used as a precursor for the synthesis of other bioactive compounds such as hormones and vitamins. It is also used in the formulation of certain types of cosmetic and personal care products, such as skin creams and lotions.
In Vitro	Cholesteryl n-butyrate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
