### BIOLOGICAL ACTIVITY

<b>Description</b>	4-(Trifluoromethyl)benzoic acid is a biochemical reagent that can be used as a biological material or organic compound for life science related research.
<b>In Vitro</b>	4-(Trifluoromethyl)benzoic acid was used in the synthesis of salicylanilide 4-(trifluoromethyl)benzoates via N,N'-dicyclohexylcarbodiimide coupling in dry N,N-dimethylformamide. It was used as internal standard during the ultra trace analysis of fluorinated aromatic Carboxylic acids by GC/MS method. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
