Dihexadecyl hydrogen phosphate

Cat. No.:	HY-W099547		
CAS No.:	2197-63-9		
Molecular Formula:	C ₃₂ H ₆₇ O ₄ P		
Molecular Weight:	546.85		
Target:	Liposome		
Pathway:	Metabolic Enzyme/Protease		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description

Dihexadecyl hydrogen phosphate is an organic compound belonging to phospholipids. It's often used as an emulsifier, which means it helps mix two substances together that don't usually mix well, such as oil and water. Dihexadecyl hydrogen phosphate has several applications in the food industry, especially in the production of processed foods where it improves texture and stability. Additionally, it has applications in the pharmaceutical industry where it can be used in the generation of micelles, liposomes, and other types of artificial membranes.

In Vitro

Dihexadecyl hydrogen phosphate is a biochemical reagent that can be used as a biological material or organic compound for life science related research.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
