Sodium dodecanoate, 99-100%

Cat. No.:	HY-W099601
CAS No.:	629-25-4
Molecular Formula:	C ₁₂ H ₂₃ NaO ₂
Molecular Weight:	222.3
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Store at room temperature, keep dry and cool

BIOLOGICAL ACTIVITY

Description	Sodium Laurate is an organic compound belonging to fatty acids. It is the sodium salt of lauric acid, a medium-chain saturated fatty acid found in various animal and vegetable fats. Sodium Laurate is commonly used as surfactants, emulsifiers and cleaning agents in various industries such as cosmetics, personal care and detergent industries. It's found in a variety of products, including soaps, shampoos, toothpaste, and laundry detergent. Furthermore, it also has applications in the food industry where it is used as a food additive to improve texture and stability.
In Vitro	Sodium Laurate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
