### BIOLOGICAL ACTIVITY

<b>Description</b>	Myristyl dimethylamine oxide is a cationic surfactant belonging to the family of amine oxides. It is commonly used as a foam booster, thickener and conditioning agent in a variety of personal care and household cleaning products. Myristyl dimethylamine oxide has several properties suitable for these applications, including the ability to reduce surface tension, increase viscosity and provide antistatic properties. In addition, it can be used as a raw material for the production of other surfactants and specialty chemicals.
<b>In Vitro</b>	Myristyl dimethylamine oxide is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
