Butylated hydroxytoluene-d₂₁

Cat. No.:	HY-Y0172S
CAS No.:	64502-99-4
Molecular Formula:	C ₁₅ H ₃ D ₂₁ O
Molecular Weight:	241.48
Target:	Ferroptosis; Endogenous Metabolite
Pathway:	Apoptosis; Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Butylated hydroxytoluene-d ₂₁ is the deuterium labeled Butylated hydroxytoluene[1]. Butylated hydroxytoluene is an antioxidant widely used in foods and in food-related products[2]. Butylated hydroxytoluene is a Ferroptosis inhibitor[3].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
