## Methyl Salicylate-d<sub>4</sub>

Cat. No.:	HY-Y0189S
CAS No.:	1219802-12-6
Molecular Formula:	C <sub>8</sub> H <sub>4</sub> D <sub>4</sub> O <sub>3</sub>
Molecular Weight:	156.17
Target:	COX
Pathway:	Immunology/Inflammation
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Methyl Salicylate-d <sub>4</sub> is the deuterium labeled Methyl Salicylate[1]. Methyl Salicylate (Wintergreen oil) is a topical analgesic and anti-inflammatory agent. Also used as a pesticide, a denaturant, a fragrance ingredient, and a flavoring agent in food and tobacco products[2]. A systemic acquired resistance (SAR) signal in tobacco[3]. A topical nonsteroidal anti-inflammatory agent (NSAID). Methyl salicylate lactoside is a COX inhibitor[5].
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
