## Donkey anti Goat IgG (heavy and light chains), conjugated with TRITC

Catalogue number: **DoAG/IgG(H+L)/TRITC**

Clone	Polyclonal
Product Type	Secondary Antibodies
Units	2 ml
Host	Donkey
Species reactivity	Goat
Application	ELISA Immunocytochemistry Immunofluorescence Immunohistochemistry (frozen)

## Distributors

For Purchasing Information, please contact your local distributor

### Cross Reactivity

Inter-species cross-reactivity is a normal feature of antibodies to immunoglobulins, since Ig of different species frequently share antigenic determinants. Cross-reactivity of this antiSerum has been tested in double radial immunodiffusion with the following results: Bovine ++ Guinea Pig ± Mouse ± Rat ± Cat ± Hamster - Monkey + Sheep ++ Chicken - Horse - pigeon - Swine - Dog ± Human + Rabbit ± Turkey - A negative cross-reaction in double radial immunodiffusion does not exclude some reaction in more sensitive techniques.

### Specificity

Tetramethylrhodamine isothiocyanate-conjugated IgG fraction of polyclonal Donkey antiSerum to Goat IgG, heavy and light chains.

### Storage

Lyophilized – can be stored at +4oC. After reconstitution aliquots can be stored at -20C.

### Caution

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Nordic-MUBio accepts no liability for any inaccuracies or omissions in this information.
