Goat Peroxidase-anti-Peroxidase

Catalogue number: **G/PAP**

Clone	Polyclonal
Product Type	Secondary Antibodies
Units	1 ml
Host	Goat

Distributors

For Purchasing Information, please contact your local distributor

[Find Distributor](#)

Background

Peroxidase staining of unlabelled goat IgG antibodies.

Source

Highly purified horseradish peroxidase.

Product

Hyperimmune goat IgG against horseradish peroxidase reacted with peroxidase lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). 0.005% Merthiolate.

Applications

Specificity

Soluble Goat peroxidase-anti-peroxidase immune complex.

Storage

The lyophilized product is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. It is reconstituted by adding 1 ml sterile distilled water, spun down to remove insoluble particles, divided into small aliquots, frozen and stored at or below -20°C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the product. Lyophilized at +4° C--at least 10 years. Reconstituted at or below -20° C--3-5 years. Reconstituted at +4° C--7 days.

Caution

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as

reasonably achievable, but Nordic-MUbio accepts no liability for any inaccuracies or omissions in this information.
