Goat IgG, conjugated with Horseradish peroxidase

Catalogue number: **GlgG/PO**

Product Type	Isotype control
Units	1 ml
Host	Goat
Species reactivity	Goat
Application	Dot blot ELISA Immunoblotting Immunocytochemistry Immunohistochemistry (paraffin)

Background

As a substitute for a non-relevant antibody, labelled with peroxidase or an alternative for the goat PAP complex.

Product

Horseradish peroxidase coupled purified goat IgG in phosphate buffered saline (pH7.2). No preservative added

Applications

ELISA, Immunocytochemistry, Immunohistochemistry (paraffin), Dot blot, Immunoblotting. The conjugate is shipped at ambient temperature and may be stored at +4°C, prolonged storage at -20°C. Reconstitute the lyophilized antiserum by adding 1 ml sterile distilled water. Spin down to remove insoluble particles, divide into small aliquots, and store frozen at or below -20°C. Prior to use an aliquot is thawed at ambient temperature, spun down again, and used to prepare working dilutions by adding sterile PBS pH7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the conjugate. Diluted conjugate should be stored at +4°C, not refrozen, and preferably used the same day.

Specificity

Horseradish-conjugated polyclonal Goat IgG

Storage

Lyophilized at +4°C--at least 10 years. Reconstituted at or below -20°C--3-5 years reconstituted at +4°C--7 days

Caution

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. This datasheet is as accurate as reasonably achievable, but Nordic-MUbio accepts no liability for any inaccuracies or omissions in this information.
