Catalogue Number	BUF1DA2SHE17-MSXX
Product Name	Fresh human peripheral blood buffy coat from sodium heparin blood - male donor - ambient overnight delivery
Size	17 ml

Product Description

Fresh human peripheral blood buffy coat produced from fresh whole blood from a male donor collected in Vacutainers containing sodium heparin anticoagulant. The buffy coat is produced by centrifugation of 340 ml whole blood. Total final volume is typically 17 ml. Blood comes from a healthy donor aged between 18-66. Donors are screened and tested negative for HIV, Hepatitis B and C and Syphilis. The buffy coat is stored and shipped under ambient conditions. The buffy coat is shipped overnight to arrive the day after collection.

These products are for use in Biomedical Research only. They are not to be used for any form of human treatment, or for any purpose that is prohibited by law, including any use for human reproductive cloning.

Product Temperature	Ambient
Sex	Male
Pooling	Single donor
Blood Group	Not specified
Sample Age	Overnight

Important Information

This product is for Research Use Only and not for any diagnostic, therapeutic or human use.

The product originates from human tissue and may be contaminated with infectious agents. Whilst it has been tested with research grade tests, it should be handled with all appropriate biosafety precautions applicable to material of this type.

Donors give their consent for the use of their samples in biomedical research, (including commercial research) relating to the development and production of new medical treatments, medical services, medical tests, medical devices, biomedical research technologies, a wide range of research studies. Donor consent is given for DNA analysis and/or DNA extraction and/or any other form of genetic analysis and for animal research including xenografts.

It is your responsibility to ensure that you have necessary licensing and ethical approvals in place for the use and storage of any human tissue related material supplied by Research Donors Ltd.
