Datasheet for 003-0104-0002

Chicken IgG F(ab')2

Overview

Description:	Chicken IgG F(ab')2 Fragment - 003-0104-0002
Item No.:	003-0104-0002
Size:	2 mg
Applications:	SDS-PAGE, Cellular Assay, FC, Functional Assay
Origin:	Chicken

Product Details

Background:	Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsinization for phagocytosis. This product possesses the F(ab')2 fragment, recognized by the two F(ab) fragments yielded from the digestion of the antibody below the disulfide bond hinge region.
Synonyms:	Chicken IgG F(ab')2 fragment, Chicken IgG Fab2 fragment, Chicken IgY F(ab')2 fragment, Chicken IgY Fab2 fragment
Species of Origin:	Chicken
Format:	IgG F(ab')2
Type:	Native Protein

Target Details

Purity/Specificity:	This product was prepared from normal serum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by pepsin digestion and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Chicken IgG, anti-Chicken IgG F(ab')2 and anti-Chicken Serum. No reaction was observed against anti-Chicken IgG F(c) or anti-Pepsin.

Application Details

Tested Applications:	SDS-PAGE

Suggested Applications:	Cellular Assay, FC, Functional Assay (Based on references)
Application Note:	Chicken IgG F(ab')2 fragment has been tested by SDS-PAGE and can be utilized as a control or standard reagent in Western Blotting and ELISA experiments.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
