Datasheet for 009-001-S30S

KAT9 (ELP3)-GST fusion

Overview

Description:	KAT9 (ELP3)-GST fusion protein - 009-001-S30S
Item No.:	009-001-S30S
Size:	20 μg
Origin:	Human
Expressed in:	Sf9 cells

Product Details

Background: KAT9 (also known as ELP3) is the catalytic subunit of the histone acetyltransferase (HAT)

elongator complex, which contributes to transcript elongation and also regulates the maturation of projection neurons. The knockdown of KAT9 by antisense morpholinos in zebrafish embryos resulted in dose-dependent shortening and abnormal branching of motor neurons with no concomitant morphologic abnormalities (1). KAT9 knockdown also impairs paternal DNA demethylation as indicated by reporter binding, immunostaining, and bisulfite sequencing (2). KAT9 Protein is ideal for investigators involved in Signaling Proteins, Acetyl/Methyltransferase Proteins, Apoptosis/Autophagy, Cancer, Cardiovascular Disease, Cell Cycle, ERK/MAPK Pathway, Inflammation, Invasion/Metastasis, Metabolic Disorder, Neurobiology, NfkB Pathway, and

PKA/PKC Pathway research.

Synonyms: KAT9, ELP3, FLJ10422, Elongator complex protein 3, hELP3, EC 2.3.1.48

Species of Origin: Human

Type: Recombinant Protein

Sf9 cells

Target Details

Expressed in:

Gene Name: ELP3

Purity/Specificity: Recombinant full-length human KAT9 (ELP3) was expressed by baculovirus in Sf9 insect cells

using an N-Terminal Glutathione-S-Transferase fusion protein. The purity was determined to be

>75% by densitometry.

Application Details

Application Note:	KAT9 Protein is stored in 50mM Tris-HCl, pH 7.5, 150mM NaCl, 10mM glutathione, 0.1mM EDTA, 0.25mM DTT, 0.1mM PMSF, 25% glycerol. KAT9 Protein is suitable for use in Western Blot. Expect a band approximately ~86kDa on specific lysates or tissues. Specific conditions for reactivity should be optimized by the end user.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
WB:	User Optimized

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	0.1 μg/μL
Buffer:	See application note.

Shipping & Handling

Shipping Condition:	Dry Ice
Storage Condition:	Store product at -70°C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.
Expiration:	Expiration date is one (1) year from date of receipt.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale. Suggested uses of our products are not recommendations to use our products in violation of any patent or as a license under any patent of Rockland Immunochemicals, Inc. If you require a commercial license to use this material and do not have one, then return this material, unopened to: Rockland Inc., P.O. BOX 5199, Limerick, Pennsylvania, USA.
