Datasheet for 009-001-S90S

PFTK1 (CDK14) protein-GST fusion

Overview

Description:	PFTK1 (CDK14) recombinant protein-GST fusion protein - 009-001-S90S
Item No.:	009-001-S90S
Size:	20 μg
Origin:	Human
Expressed in:	Sf9 cells

Product Details

Background: PFTK1, also known as PFTAIRE protein kinase 1, is a member of the CDC2 -related protein kinase

family which is expressed primarily in the postnatal and adult nervous system (1). PFTK1 is highly expressed in brain, pancreas, kidney, heart, testis, and ovary. PFTK1 interacts with 14-3-3-beta, 14-3-3-epsilon, 14-3-3-eta and 14-3-3-tau. Using PFTK1 mutant constructs and in vitro and in vivo binding studies, it was shown that PFTK1 amino acid residue ser119 is required for its interaction with all four 14-3-3 isoforms. (2). Significant upregulation of PFTK1 expression is observed in esophageal squamous cell carcinoma (ESCC). PFTK1 is not only useful as a prognostic marker in ESCC, but also as a predictor of the response to chemotherapy. PFTK1 Protein is ideal for investigators involved in Signaling Proteins, Cellular Proteins, Cancer, Cell

Cycle, and Ser/Thr Kinases research.

Synonyms: CDK14, PFTAIRE1, Cyclin-dependent kinase 14

Species of Origin: Human

Expressed in: Sf9 cells

Type: Recombinant Protein

Target Details

Gene Name: CDK14

Purity/Specificity: Recombinant full-length human PFTK1 (CDK14) was expressed by baculovirus in Sf9 insect cells

using an N-Terminal Glutathione-S-Transferase fusion protein. The purity was determined to be

>95% by densitometry.

Application Details

Application Note:	PFTK1 Protein is stored in 50mM Tris-HCl, pH 7.5, 50mM NaCl, 10mM glutathione, 0.1mM EDTA, 0.25mM DTT, 0.1mM PMSF, 25% glycerol. PFTK1 Protein is suitable for use in Western Blot and Kinase Assay. Expect a band approximately ~72kDa on specific lysates or tissues. Specific conditions for reactivity should be optimized by the end user.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
WB:	User Optimized

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	0.1 μg/μL
Buffer:	See application note.

Shipping & Handling

Shipping Condition:	Dry Ice
Storage Condition:	Store product at -70°C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.
Expiration:	Expiration date is one (1) year from date of receipt.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale. Suggested uses of our products are not recommendations to use our products in violation of any patent or as a license under any patent of Rockland Immunochemicals, Inc. If you require a commercial license to use this material and do not have one, then return this material, unopened to: Rockland Inc., P.O. BOX 5199, Limerick, Pennsylvania, USA.
