**Datasheet for 009-001-T46S****SNCB protein-HIS Epitope****Overview**

<b>Description:</b>	SNCB recombinant protein-HIS Epitope - 009-001-T46S
<b>Item No.:</b>	009-001-T46S
<b>Size:</b>	20 µg
<b>Origin:</b>	Human
<b>Expressed in:</b>	E. coli

**Product Details**

<b>Background:</b>	SNCB is a member of the synuclein family of proteins which are believed to be involved in the pathogenesis of neurodegenerative diseases. SNCB is highly homologous to alpha-synuclein which is abundantly expressed in the brain and putatively inhibits phospholipase D2 selectively. SNCB may play a role in neuronal plasticity, is abundant in neurofibrillary lesions of patients with Alzheimer disease. SNCB is shown to be highly expressed in the substantia nigra of the brain, a region of neuronal degeneration in patients with Parkinson disease but no direct relation to Parkinson disease has been established (1). An alteration in SNCB may impair its normal inhibitory action on the formation of toxic alpha-synuclein fibrils, thereby indirectly contributing to disease pathogenesis (2). SNCB Protein is ideal for investigators involved in Signaling Proteins, Microtubule/Actin Associated Proteins, Cancer, and Neurobiology research.
<b>Synonyms:</b>	Beta-synuclein, PNP 14, Phosphoneuroprotein 14
<b>Species of Origin:</b>	Human
<b>Expressed in:</b>	E. coli
<b>Type:</b>	Recombinant Protein

**Target Details**

<b>Gene Name:</b>	SNCB
<b>Purity/Specificity:</b>	Recombinant full length human SNCB was expressed in E. coli cells using an N-Terminal his epitope. The purity was determined to be >95% by densitometry.

## Application Details

**Application Note:** SNCB Protein is stored in 50mM sodium phosphate, pH 7.0, 300mM NaCl, 150mM imidazole, 0.1mM PMSF, 0.25mM DTT, 25% glycerol. SNCB Protein is suitable for use in Western Blot. Expect a band approximately ~19kDa on specific lysates or tissues. Specific conditions for reactivity should be optimized by the end user.

**Assay Dilutions:** All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

**WB:** User Optimized

## Formulation

**Physical State:** Liquid (sterile filtered)

**Concentration:** 0.2 µg/µL

**Buffer:** See application note.

## Shipping & Handling

**Shipping Condition:** Dry Ice

**Storage Condition:** Store product at -70°C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

**Expiration:** Expiration date is one (1) year from date of receipt.

## Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale. Suggested uses of our products are not recommendations to use our products in violation of any patent or as a license under any patent of Rockland Immunochemicals, Inc. If you require a commercial license to use this material and do not have one, then return this material, unopened to: Rockland Inc., P.O. BOX 5199, Limerick, Pennsylvania, USA.
