**Datasheet for 012-0104****Rat IgG F(ab')<sub>2</sub>****Overview**

<b>Description:</b>	Rat IgG F(ab') <sub>2</sub> Fragment (BULK ORDER) - 012-0104
<b>Item No.:</b>	012-0104
<b>Size:</b>	10 mg
<b>Applications:</b>	SDS-PAGE
<b>Origin:</b>	Rat

**Product Details**

<b>Background:</b>	Rat IgG F(ab') <sub>2</sub> Fragment is a proteolytic fragment of immunoglobulin G (IgG) obtained by limited digestion with the enzyme pepsin under controlled conditions of temperature, time and pH. Rat IgG F(ab') <sub>2</sub> molecules lack the Fc portion of Rat IgG and therefore receptors that bind Rat IgG Fc will not bind Rat IgG F(ab') <sub>2</sub> molecules. This product possesses the F(ab') <sub>2</sub> fragment, recognized by the two F(ab) fragments yielded from the digestion of the antibody below the disulfide bond hinge region.
<b>Synonyms:</b>	Rat IgG F(ab') <sub>2</sub> fragment, Rat IgG Fab <sub>2</sub> fragment
<b>Species of Origin:</b>	Rat
<b>Format:</b>	IgG F(ab') <sub>2</sub>
<b>Type:</b>	Native Protein

**Target Details**

<b>Purity/Specificity:</b>	This product was prepared from normal serum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by pepsin digestion and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rat IgG, anti-Rat IgG F(ab') <sub>2</sub> and anti-Rat Serum. No reaction was observed against anti-Rat IgG F(c) or anti-Pepsin.

**Application Details**

<b>Tested Applications:</b>	SDS-PAGE
-----------------------------	----------

**Application Note:** Rat IgG F(ab')<sub>2</sub> Fragment has been tested in SDS-Page and are ideal for ELISA, western blotting, Immunohistochemistry, as well as other antibody detection methods.

**Assay Dilutions:** All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
