## Datasheet for A003-09

**Avidin Texas Red™ Conjugated****Overview**

<b>Description:</b>	Avidin Texas Red™ Conjugated - A003-09
<b>Item No.:</b>	A003-09
<b>Size:</b>	2 mg
<b>Applications:</b>	WB, IHC

**Product Details**

<b>Background:</b>	Avidin Texas Red™ Conjugated is suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
<b>Synonyms:</b>	Avidin Texas Red™ Conjugated
<b>Conjugate:</b>	Texas Red®
<b>F/P Ratio:</b>	1.21

**Target Details**

<b>Purity/Specificity:</b>	Avidin Texas Red™ Conjugated was prepared from chromatographically purified avidin from egg white followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Avidin. No reaction was observed against anti-Streptavidin.
<b>Relevant Links:</b>	<ul style="list-style-type: none"><li>• <a href="#">UniProtKB - P02701</a></li></ul>

**Application Details**

<b>Tested Applications:</b>	WB
<b>Suggested Applications:</b>	IHC (Based on references)
<b>Application Note:</b>	Avidin Texas Red™ Conjugated has been tested by western blot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting.

**Assay Dilutions:** All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

---

**FLISA:** 1:10,000 - 1:50,000

---

**IF:** 1:1,000 - 1:5,000

---

## Formulation

**Physical State:** Lyophilized

---

**Concentration:** 2.0 mg/mL by UV absorbance at 280 nm

---

**Buffer:** 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

---

**Preservative:** 0.01% (w/v) Sodium Azide

---

**Stabilizer:** 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

---

**Reconstitution Volume:** 1.0 mL

---

**Reconstitution Buffer:** Restore with deionized water (or equivalent)

---

## Shipping & Handling

**Shipping Condition:** Ambient

---

**Storage Condition:** Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

---

**Expiration:** Expiration date is one (1) year from date of receipt.

---

## Images

### Immunofluorescence Microscopy

Mast cells are increased in allo-WT recipients after murine bone marrow transplant. (C) Mast cell staining by avidin or toluidine blue has a high correspondence across two different skin sections from the same animal [syngeneic (n = 6), allo-WT (n = 16), and allo-MCd (n = 14)]. Representative images from avidin-stained skin (blue = DAPI, red = Avidin). Arrows denote nucleated mast cells. Figure 3. PMID: 31681336.

### Immunofluorescence Microscopy

Mast cells are present in multiple tissues after transplant and display evident degranulation in allo-WT mice. (B) Skin and ear sections were stained with avidin and mast cells counted per high-power field (blue = DAPI, red = avidin). (C) Representative images of avidin-stained mast cells in the ear. (D) Degranulation was evident in this representative image of skin from allo-WT mice. \*P = 0.01–0.05, \*\*P = 0.001–0.01, \*\*\*P = 0.0001–0.001, \*\*\*\*P < 0.0001, NS, not significant. SFig 2. PMID: 31681336.

### Bottle

Avidin Texas Red™ Conjugated

**Western Blot**

Western Blot of AVIDIN Texas Red™ Conjugated Lane 2:  
Biotin conjugated Guinea Pig IgG Load: 100 ng per lane  
Secondary antibody: AVIDIN Texas Red™ Conjugated at  
1:1,000 for 30 min at RT Block: 1% BSA-TTBS 30 min RT  
Predicted/Observed size: 55 and 28 kDa, 55 and 28 kDa
