Datasheet for KOA0266**Human MMP-1 ELISA Kit****Overview**

Description:	Human MMP-1 AccuSignal ELISA Kit - KOA0266
Item No.:	KOA0266
Size:	1 Kit
Applications:	ELISA
Reactivity:	Human
Range:	156 pg/ml - 10000 pg/ml

Product Details

Background:	Matrix metalloproteinase-1(MMP-1) is also known as collagenase. Matrix metalloproteinases (MMPs) are zinc-dependent proteases that degrade extracellular matrix proteins. The MMPs comprise a family of at least 20 proteolytic enzymes that play an essential role in tissue remodeling. Matrix metalloproteinase-1(MMP-1) plays an important role in the degradation of collagen in inflammatory diseases. MMP1(interstitial collagenase), MMP9(gelatinase B) and MMP12(macrophage elastase) are thought to be important in the development of emphysema. Smoking-induced MMP-1 might be important in the skin-ageing effects of tobacco smoking. The standard product used in this kit is human MMP-1 with the molecular mass of 51-53KDa. The detected MMP-1 includes zymogen and active enzyme.
Synonyms:	27 kDa interstitial collagenase, CLG, CLGN, Fibroblast collagenase, Interstitial collagenase, Matrix metalloproteinase 1 (interstitial collagenase), Matrix Metalloproteinase 1, Matrix metalloproteinase-1, MMP 1, MMP-1, MMP1, MMP1_HUMAN
Detection Kit Type:	ELISA Kit
Detection Range:	156 pg/ml - 10000 pg/ml
Sensitivity:	<10 pg/ml

Target Details

Gene Name:	MMP1
Reactivity:	Human
Immunogen:	Expression system for standard: NSO; Immunogen sequence: F20-N469

Purity/Specificity: Natural and recombinant human total MMP-1. There is no detectable cross-reactivity with other relevant proteins.

Application Details

Tested Applications: ELISA

Application Note: Useful in Sandwich ELISA for Quantitative Detection of Antigen. Aliquot 0.1ml per well of the 10000pg/ml, 5000pg/ml, 2500pg/ml, 1250pg/ml, 625pg/ml, 312pg/ml, 156pg/ml human MMP-1 standard solutions into the precoated 96-well plate. Add 0.1ml of the sample diluent buffer into the control well (Zero well). Add 0.1ml of each properly diluted sample of human cell culture supernates, serum or plasma (heparin) to each empty well. It is recommended that each human MMP-1 standard solution and each sample be measured in duplicate.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

Formulation

Anticoagulant: Heparin Sodium

Shipping & Handling

Shipping Condition: Wet Ice

Storage Condition: Store vials at 4°C prior to opening. Centrifuge product if not completely clear after standing at room temperature. This product is stable for 6 months at 4°C as an undiluted liquid. Dilute only prior to immediate use. For extended storage freeze at -20°C or below for 12 months. Avoid cycles of freezing and thawing.

Expiration: See kit insert for complete instructions.
