**Datasheet for MB-029-1000****10X Tris-Glycine****Overview**

<b>Description:</b>	10X Tris-Glycine (0.2 M Tris, 1.5 M Glycine, pH 8.0) - MB-029-1000
<b>Item No.:</b>	MB-029-1000
<b>Size:</b>	1 L

**Product Details**

<b>Background:</b>	Tris-Glycine Running Gel buffer without SDS (sodium dodecyl sulfate) for polyacrylamide gel electrophoresis, describes a technique widely used in biochemistry to separate proteins according to their electrophoretic mobility (a function of the length of a polypeptide chain and its charge) and no other physical feature. SDS is an anionic detergent applied to protein sample to linearize proteins and to impart a negative charge to linearized proteins.
<b>Synonyms:</b>	polyacrylamide running buffer, Protein Gel Running Buffer, polyacrylamide gel running buffer, Tris-Glycine buffer

**Target Details**

<b>Purity/Specificity:</b>	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
<b>Relevant Links:</b>	<ul style="list-style-type: none"><li><a href="#">MB-029 SDS</a></li></ul>

**Application Details**

<b>Application Note:</b>	Tris-Glycine running buffer is suitable for laboratory involved in protein biochemistry. Visit our newly expanded web site at <a href="http://www.rockland.com">www.rockland.com</a> for methods using this and other buffers. This product is a 10X concentrated stock solution and should be diluted appropriately with distilled, deionized water (or equivalent) to its final working concentration. No pH adjustment is required. 10X Tris-Glycine Running Buffer consists of 0.2 M Tris HCl, 1.5 M Glycine; pH 8.0. Meticulously prepared using ultra-pure reagents dissolved in highly polished pharmaceutical grade deionized water.
<b>Assay Dilutions:</b>	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.

## Formulation

<b>Physical State:</b>	Liquid (sterile filtered)
<b>Concentration:</b>	10X
<b>Buffer:</b>	See application note.
<b>Preservative:</b>	None
<b>Stabilizer:</b>	None

## Shipping & Handling

<b>Shipping Condition:</b>	Ambient
<b>Storage Condition:</b>	Store container at room temperature (18° to 26° C) prior to opening. If desired, the solution may be stored at 4° C or less. Some salts may precipitate out of solution at lower temperature. Allow buffer to equilibrate to room temperature (18° to 26° C) to restore solubility of some salts.
<b>Expiration:</b>	Expiration date is six (6) months from date of receipt.
