ROM-K (m): 293T Lysate: sc-123254

BACKGROUND

ROM-K, an ATP-sensitive inward rectifying K⁺ channel (also designated Kir1.1), is a member of the Kir family of K⁺ channels that controls renal K⁺ secretion. These K⁺ channels more readily conduct an inward current rather than an outward current and are constitutively open. Inwardly rectifying K⁺ channels are a complex of four Kir (Kir1-6) subunits. ROM-K is activated by protein kinase A, and its activity is regulated by phosphatidylinositol 4,5-bisphosphate and intracellular pH. Alternative splicing of ROM-K mRNA yields various isoforms which are differentially expressed in nephrons of the mammalian kidney. Mutations in the ROM-K gene are linked to antenatal Bartter syndrome, an autosomal recessive disorder of renal electrolyte transport.

CHROMOSOMAL LOCATION

Genetic locus: Kcnj1 (mouse) mapping to 9 A4.

PRODUCT

ROM-K (m): 293T Lysate represents a lysate of mouse ROM-K transfected 293T cells and is provided as 100 µg protein in 200 µl SDS-PAGE buffer.

STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

PROTOCOLS

See our web site at www.scbt.com for detailed protocols and support products.

APPLICATIONS

ROM-K (m): 293T Lysate is suitable as a Western Blotting positive control for mouse reactive ROM-K antibodies. Recommended use: 10-20 µl per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

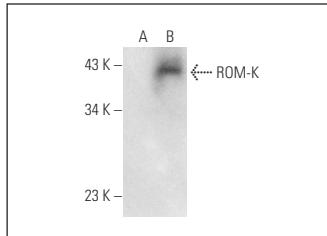

ROM-K (D-3): sc-393189 is recommended as a positive control antibody for Western Blot analysis of enhanced mouse ROM-K expression in ROM-K transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

1) Western Blotting: use m-IgG_x BP-HRP: sc-516102 or m-IgG_x BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

DATA

ROM-K (D-3): sc-393189. Western blot analysis of ROM-K expression in non-transfected: sc-117752 (**A**) and mouse ROM-K transfected: sc-123254 (**B**) 293T whole cell lysates.

RESEARCH USE

For research use only, not for use in diagnostic procedures.
