# Sipa1l1 (m): 293T Lysate: sc-123556

## BACKGROUND

The Rap family of small GTPases is closely related to Ras and may function as an antagonist to the Ras signaling pathway by trapping Ras effectors in an inactive complex. Similar to other guanine-binding proteins (such as the heterotrimeric G proteins), the Ras proteins cycle between an active guanosine-triphosphate (GTP) bound form and an inactive, guanosine-diphosphate (GDP) bound form. The weak intrinsic GTPase activity of Ras proteins is greatly enhanced by the action of GTPase-activating proteins (GAPs). Sipa1l1 (signal-induced proliferation-associated 1 like 1), also known as spine-associated RapGAP (SPAR), and designated E6TP1 in human, is a Rap-specific GTPase-activating protein (RapGAP) that interacts with the guanylate kinase-like domain of post-synaptic density protein-95 (PSD-95) and forms a complex with PSD-95 and with N-methyl-D-aspartate (NMDA) receptors in the brain. In heterologous neurons, Sipa1l1 reorganizes the Actin cytoskeleton and recruits PSD-95 to F-Actin. In hippocampal neurons, Sipa1l1 localizes to dendritic spines and causes enlargement of spine heads, many of which adopt an irregular appearance.

## CHROMOSOMAL LOCATION

Genetic locus: Sipa1l1 (mouse) mapping to 12 D1.

## PRODUCT

Sipa1l1 (m): 293T Lysate represents a lysate of mouse Sipa1l1 transfected 293T cells and is provided as 100 µg protein in 200 µl SDS-PAGE buffer.

## APPLICATIONS

Sipa1l1 (m): 293T Lysate is suitable as a Western Blotting positive control for mouse reactive Sipa1l1 antibodies. Recommended use: 10-20 µl per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
