SR- β (m): 293T Lysate: sc-123766

BACKGROUND

The β -subunit of the signal recognition particle receptor (SR- β), a member of the Ras family of small molecular weight GTPases, targets nascent polypeptides to the protein translocation machinery in the ER. The signal recognition particle receptor (SRP) is a heterodimer of two polypeptides, SR- α and SR- β . The interaction of three GTPases, SRP54, SR- α , and SR- β , controls cotranslational protein transport to the ER. SR- β regulates the interaction of SR with the ribosome and thereby allows SR- α to scan membrane-bound ribosomes for the presence of SRP.

CHROMOSOMAL LOCATION

Genetic locus: Srpib (mouse) mapping to 9 F1.

PRODUCT

SR- β (m): 293T Lysate represents a lysate of mouse SR- β transfected 293T cells and is provided as 100 μ g protein in 200 μ l SDS-PAGE buffer.

STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

APPLICATIONS

SR- β (m): 293T Lysate is suitable as a Western Blotting positive control for mouse reactive SR- β antibodies. Recommended use: 10-20 μ l per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

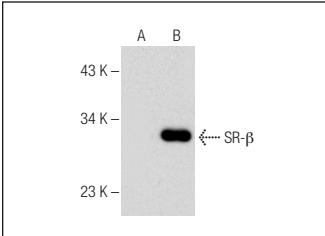

SR- β (D-4): sc-376723. is recommended as a positive control antibody for Western Blot analysis of enhanced mouse SR- β expression in SR- β transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

- 1) Western Blotting: use m-IgG κ BP-HRP: sc-516102 or m-IgG κ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

DATA

SR- β (D-4): sc-376723. Western blot analysis of SR- β expression in non-transfected: sc-117752 (**A**) and mouse SR- β transfected: sc-123766 (**B**) 293T whole cell lysates.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com for detailed protocols and support products.
