# ASTL (m): 293T Lysate: sc-126457

## BACKGROUND

ASTL (astacin-like metalloendopeptidase), also known as ovastacin, is a 435 amino acid protein that belongs to the astacin family of metalloproteases. The human ASTL, which shares a 78% sequence identity with mouse ASTL, contains an N-terminal signal peptide, a prodomain, a zinc-dependent metalloprotease domain and a C-terminal extension that is likely to be heavily O-glycosylated. Highly expressed in unfertilized oocytes, ASTL expression drops to undetectable levels upon fertilization. ASTL has also been shown to be under hormonal regulation, as superovulation caused a dramatic increase in the expression of ASTL. The catalytic activity of ASTL is inhibited by EDTA and the wide spectrum metalloproteinase inhibitor batimastat (BB-94). The gene encoding ASTL maps to chromosome 2q11.1. Two isoforms of ASTL2 exist as a result of alternative splicing events.

## CHROMOSOMAL LOCATION

Genetic locus: *Astl* (mouse) mapping to 2 F1.

## PRODUCT

ASTL (m): 293T Lysate represents a lysate of mouse ASTL transfected 293T cells and is provided as 100 µg protein in 200 µl SDS-PAGE buffer.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## APPLICATIONS

ASTL (m): 293T Lysate is suitable as a Western Blotting positive control for mouse reactive ASTL antibodies. Recommended use: 10-20 µl per lane.

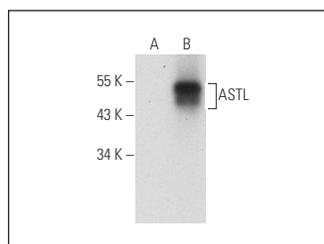

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

ASTL (D-8): sc-514054 is recommended as a positive control antibody for Western Blot analysis of enhanced mouse ASTL expression in ASTL transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

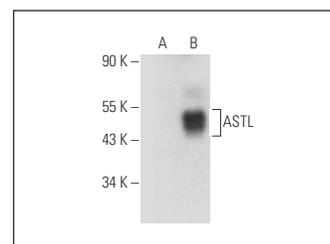

## RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended: 1) Western Blotting: use m-IgGκ BP-HRP: sc-516102 or m-IgGκ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

## DATA

ASTL (D-8): sc-514054. Western blot analysis of ASTL expression in non-transfected: sc-117752 (A) and mouse ASTL transfected: sc-126457 (B) 293T whole cell lysates.

ASTL (F-10): sc-514391. Western blot analysis of ASTL expression in non-transfected: sc-117752 (A) and mouse ASTL transfected: sc-126457 (B) 293T whole cell lysates.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
