LASP-1 (h3): 293T Lysate: sc-159181

The Power to Question

BACKGROUND

LASP-1 (LIM and SH3 domain protein 1), also known as MLN50, is a 261 amino acid protein that localizes to both the cytoplasm and the cytoskeleton and contains one SH3 domain, one LIM zinc-binding domain and 2 nebulin repeats. Expressed as two alternatively spliced isoforms, LASP-1 interacts with F-Actin and plays an important role in the regulation of Actin-associated cytoskeletal organization. LASP-1 is subject to post-translational phosphorylation, an event which may regulate Actin-related ion transport activities in epithelial cells. Overexpression of LASP-1 is associated with breast cancer, suggesting a role for LASP-1 in tumor transformation and metastasis. The gene encoding LASP-1 maps to human chromosome 17q12, which comprises over 2.5% of the human genome and encodes over 1,200 genes.

CHROMOSOMAL LOCATION

Genetic locus: LASP1 (human) mapping to 17q12.

PRODUCT

LASP-1 (h3): 293T Lysate represents a lysate of human LASP-1 transfected 293T cells and is provided as 100 µg protein in 200 µl SDS-PAGE buffer.

APPLICATIONS

LASP-1 (h3): 293T Lysate is suitable as a Western Blotting positive control for human reactive LASP-1 antibodies.

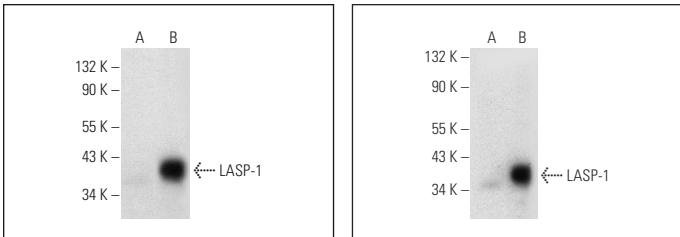

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

LASP-1 (B-3): sc-398990 is recommended as a positive control antibody for Western Blot analysis of enhanced human LASP-1 expression in LASP-1 transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

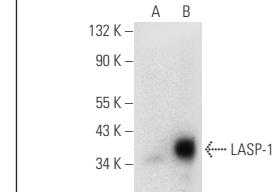

RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:
 1) Western Blotting: use m-IgG_x BP-HRP: sc-516102 or m-IgG_x BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

DATA

LASP-1 (B-3): sc-398990. Western blot analysis of LASP-1 expression in non-transfected: sc-117752 (**A**) and human LASP-1 transfected: sc-159181 (**B**) 293T whole cell lysates.

LASP-1 (G-7): sc-374059. Western blot analysis of LASP-1 expression in non-transfected: sc-117752 (**A**) and human LASP-1 transfected: sc-159181 (**B**) 293T whole cell lysates.

STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

PROTOCOLS

See our web site at www.scbt.com for detailed protocols and support products.
