adseverin (h2): 293T Lysate: sc-170369

BACKGROUND

Adseverin (ADSV), also known as scinderin (SCIN), is a 715 amino acid protein belonging to the Villin/Gelsolin family. Adseverin is a Ca^{2+} -dependent Actin filament-severing protein localized to the cytoskeleton. Adseverin is believed to have a regulatory role in exocytosis by altering the organization of the microfilament network underneath the plasma membrane. *In vitro*, adseverin has barbed end capping and nucleating activities in the presence of Ca^{2+} . Adseverin contains six Gelsolin-like repeats and is expressed as two isoforms produced by alternative splicing.

CHROMOSOMAL LOCATION

Genetic locus: SCIN (human) mapping to 7p21.3.

PRODUCT

adseverin (h2): 293T Lysate represents a lysate of human adseverin transfected 293T cells and is provided as 100 μg protein in 200 μl SDS-PAGE buffer.

RESEARCH USE

For research use only, not for use in diagnostic procedures.

APPLICATIONS

adseverin (h2): 293T Lysate is suitable as a Western Blotting positive control for human reactive adseverin antibodies. Recommended use: 10-20 μl per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

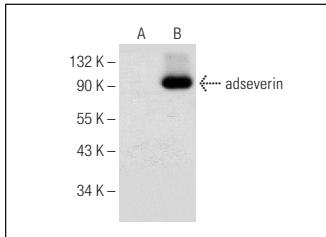

adseverin (C-2): sc-376136 is recommended as a positive control antibody for Western Blot analysis of enhanced human adseverin expression in adseverin transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

1) Western Blotting: use m-IgG κ BP-HRP: sc-516102 or m-IgG κ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

DATA

adseverin (C-2): sc-376136. Western blot analysis of adseverin expression in non-transfected: sc-117752 (**A**) and human adseverin transfected: sc-170369 (**B**) 293T whole cell lysates.

STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

PROTOCOLS

See our web site at www.scbt.com for detailed protocols and support products.
