# GIPC (h): 293T Lysate: sc-170835

## BACKGROUND

GIPC, for GAIP interacting protein at the C-terminus (also designated SEM-CAP-1 or synectin), is a PDZ domain containing protein that interacts with RGS-GAIP, a GTPase-activating protein (GAP) for  $G_{\alpha i}$  subunits. GIPC was also identified as TIP-2, a protein that interacts with the viral oncogene TAX, which transactivates viral and cellular promoters through interactions with various transcription factors. PDZ domain-containing proteins are primarily localized to cell-cell junctions in epithelial cells and neurons where they coordinate the assembly of multiprotein complexes. GIPC specifically localizes to clusters of vesicles near the plasma membrane and participates in G protein-coupled signaling pathway involved in regulating Clathrin-coated vesicular trafficking. GIPC also associates with membrane bound semaphorin F (M-SemF), which is involved in neuronal axon growth, and it appears to regulate the subcellular distribution of M-SemF in the brain.

## CHROMOSOMAL LOCATION

Genetic locus: GIPC1 (human) mapping to 19p13.12.

## PRODUCT

GIPC (h): 293T Lysate represents a lysate of human GIPC transfected 293T cells and is provided as 100  $\mu$ g protein in 200  $\mu$ l SDS-PAGE buffer.

## APPLICATIONS

GIPC (h): 293T Lysate is suitable as a Western Blotting positive control for human reactive GIPC antibodies. Recommended use: 10-20  $\mu$ l per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

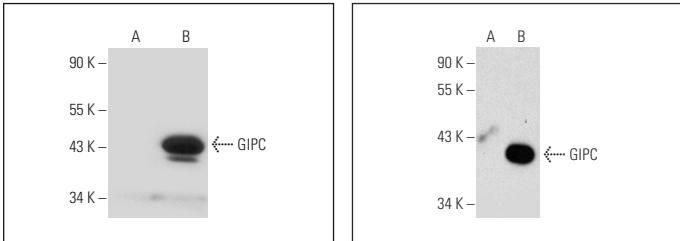

GIPC (C-9): sc-166148 is recommended as a positive control antibody for Western Blot analysis of enhanced human GIPC expression in GIPC transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

## RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

- Western Blotting: use m-IgG $\kappa$  BP-HRP: sc-516102 or m-IgG $\kappa$  BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

## DATA

GIPC (C-9): sc-166148. Western blot analysis of GIPC expression in non-transfected: sc-117752 (**A**) and human GIPC transfected: sc-170835 (**B**) 293T whole cell lysates.

GIPC (B-12): sc-271822. Western blot analysis of GIPC expression in non-transfected: sc-117752 (**A**) and human GIPC transfected: sc-170835 (**B**) 293T whole cell lysates.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
