# elf2 $\beta$ (h): 293T Lysate: sc-172562

## BACKGROUND

The initiation of protein synthesis in eukaryotic cells is regulated by interactions between protein initiation factors and RNA molecules. The eukaryotic initiation complex elf2 exists as a heterotrimeric complex of elf2 $\alpha$ , elf2 $\beta$  and elf2 $\gamma$ . elf2 functions in the early stages of protein synthesis, by forming a ternary complex with GTP and tRNA. This complex binds to the 40S ribosomal subunit, followed by mRNA binding to 40S to form the 43S preinitiation complex, the release of elf2 from 40S and the hydrolysis of GTP. Phosphorylation of elf2 $\alpha$  correlates with inhibition of translation initiation.

## CHROMOSOMAL LOCATION

Genetic locus: EIF2S2 (human) mapping to 20q11.22.

## PRODUCT

elf2 $\beta$  (h): 293T Lysate represents a lysate of human elf2 $\beta$  transfected 293T cells and is provided as 100  $\mu$ g protein in 200  $\mu$ l SDS-PAGE buffer.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## APPLICATIONS

elf2 $\beta$  (h): 293T Lysate is suitable as a Western Blotting positive control for human reactive elf2 $\beta$  antibodies. Recommended use: 10-20  $\mu$ l per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

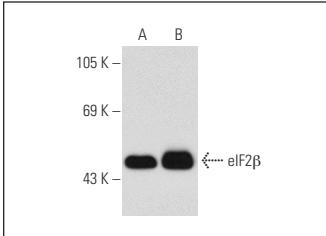

elf2 $\beta$  (D-3): sc-133209 is recommended as a positive control antibody for Western Blot analysis of enhanced human elf2 $\beta$  expression in elf2 $\beta$  transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

## RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

- Western Blotting: use m-IgG $\kappa$  BP-HRP: sc-516102 or m-IgG $\kappa$  BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

## DATA

elf2 $\beta$  (D-3): sc-133209. Western blot analysis of elf2 $\beta$  expression in non-transfected: sc-117752 (**A**) and human elf2 $\beta$  transfected: sc-172562 (**B**) 293T whole cell lysates.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
