# ORC2 (h2): 293T Lysate: sc-172764

## BACKGROUND

The initiation of DNA replication is a multi-step process that depends on the formation of pre-replication complexes, which trigger initiation. Among the proteins required for establishing these complexes are the origin recognition complex (ORC) proteins. ORC proteins bind specifically to origins of replication where they serve as scaffold for the assembly of additional initiation factors. Human ORC subunits 1-6 are expressed in the nucleus of proliferating cells and tissues, such as the testis. ORC1 and ORC2 are both expressed at equivalent concentrations throughout the cell cycle; however, only ORC2 remains stably bound to chromatin. ORC4 and ORC6 are also expressed constantly throughout the cell cycle. ORC2, ORC3, ORC4 and ORC5 form a core complex upon which ORC6 and ORC1 assemble. The formation of this core complex suggests that ORC proteins play a crucial role in the G<sub>1</sub>-S transition in mammalian cells.

## CHROMOSOMAL LOCATION

Genetic locus: ORC2 (human) mapping to 2q33.1.

## PRODUCT

ORC2 (h2): 293T Lysate represents a lysate of human ORC2 transfected 293T cells and is provided as 100 µg protein in 200 µl SDS-PAGE buffer.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.

## APPLICATIONS

ORC2 (h2): 293T Lysate is suitable as a Western Blotting positive control for human reactive ORC2 antibodies. Recommended use: 10-20 µl per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

ORC2 (3G6): sc-32734 is recommended as a positive control antibody for Western Blot analysis of enhanced human ORC2 expression in ORC2 transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

## DATA

ORC2 (3G6): sc-32734. Western blot analysis of ORC2 expression in non-transfected: sc-117752 (A) and human ORC2 transfected: sc-172764 (B) 293T whole cell lysates.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.
