# Sox-2 (h): 293T Lysate: sc-369948

## BACKGROUND

Sox genes comprise a family of genes that are related to the mammalian sex determining gene SRY. These genes similarly contain sequences that encode for the HMG-box domain, which is responsible for the sequence-specific DNA-binding activity. Sox genes encode putative transcriptional regulators implicated in the decision of cell fates during development and the control of diverse developmental processes. The highly complex group of Sox genes cluster at a minimum of 40 different loci that rapidly diverged in various animal lineages. At present 30 Sox genes have been identified, and members of this family have been shown to be conserved during evolution and to play key roles during animal development. Some are involved in human diseases, including sex reversal.

## CHROMOSOMAL LOCATION

Genetic locus: SOX2 (human) mapping to 3q26.33.

## PRODUCT

Sox-2 (h): 293T Lysate represents a lysate of human Sox-2 transfected 293T cells and is provided as 100 µg protein in 200 µl SDS-PAGE buffer.

## APPLICATIONS

Sox-2 (h): 293T Lysate is suitable as a Western Blotting positive control for human reactive Sox-2 antibodies. Recommended use: 10-20 µl per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

Sox-2 (E-4) Alexa Fluor® 790: sc-365823 AF790 is recommended as a positive control antibody for Western Blot analysis of enhanced human Sox-2 expression in Sox-2 transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

## RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended: 1) Western Blotting: use m-IgGκ BPHRP: sc-516102 or m-IgGκ BPHRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## DATA

Sox-2 (E-4): sc-365823. Western blot analysis of Sox-2 expression in non-transfected (A) and human Sox-2 transfected (B) 293T whole cell lysates.

Sox-2 (E-4): sc-365823. Western blot analysis of Sox-2 expression in non-transfected: sc-117752 (A) and human Sox-2 transfected: sc-369948 (B) 293T whole cell lysates.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
