# Rho J siRNA (m): sc-152855

The Power to Question

#### **BACKGROUND**

The Rho subfamily of Ras-related GTPases controls multiple aspects of cell function, including cytoskeletal rearrangement, nuclear signaling and cell growth. Rho J (Ras homolog gene family, member J), also known as TCL (Tc10-like GTP-binding protein TCL), ARHJ, TC10B or RASL7B (Ras-like protein family member 7B), is a member of the Rho family of the small GTPase superfamily. Preferentially expressed in heart and localizing to the cytoplasmic side of the cell membrane and to early endosomes, Rho J is believed to function as a GTP-binding protein with a possible role in clathrin-dependent endocytosis. In addition, Rho J participates in Actin dynamics, as is suggested by the induction of cortical Actin reorganization by the overexpression of Rho J. Similar to the closely related proteins TC10 and Cdc42, Rho J is capable of binding effector proteins that contain a CRIB (Cdc42/Rac interactive binding) domain. Two isoforms exist for Rho J due to alternative splicing events.

#### **CHROMOSOMAL LOCATION**

Genetic locus: Rhoj (mouse) mapping to 12 C3.

#### **RESEARCH USE**

For research use only, not for use in diagnostic procedures.

#### **PROTOCOLS**

See our web site at www.scbt.com for detailed protocols and support products.

#### **PRODUCT**

Rho J siRNA (m) is a pool of 3 target-specific 19-25 nt siRNAs designed to knock down gene expression. Each vial contains 3.3 nmol of lyophilized siRNA, sufficient for a 10  $\mu$ M solution once resuspended using protocol below. Suitable for 50-100 transfections. Also see Rho J shRNA Plasmid (m): sc-152855-SH and Rho J shRNA (m) Lentiviral Particles: sc-152855-V as alternate gene silencing products.

For independent verification of Rho J (m) gene silencing results, we also provide the individual siRNA duplex components. Each is available as 3.3 nmol of lyophilized siRNA. These include: sc-152855A, sc-152855B and sc-152855C.

#### STORAGE AND RESUSPENSION

Store lyophilized siRNA duplex at -20° C with desiccant. Stable for at least one year from the date of shipment. Once resuspended, store at -20° C, avoid contact with RNAses and repeated freeze thaw cycles.

Resuspend lyophilized siRNA duplex in 330  $\mu$ l of the RNAse-free water provided. Resuspension of the siRNA duplex in 330  $\mu$ l of RNAse-free water makes a 10  $\mu$ M solution in a 10  $\mu$ M Tris-HCl, pH 8.0, 20 mM NaCl, 1 mM EDTA buffered solution.

#### **APPLICATIONS**

Rho J siRNA (m) is recommended for the inhibition of Rho J expression in mouse cells.

#### **SUPPORT REAGENTS**

For optimal siRNA transfection efficiency, Santa Cruz Biotechnology's siRNA Transfection Reagent: sc-29528 (0.3 ml), siRNA Transfection Medium: sc-36868 (20 ml) and siRNA Dilution Buffer: sc-29527 (1.5 ml) are recommended. Control siRNAs or Fluorescein Conjugated Control siRNAs are available as 10 µM in 66 µl. Each contain a scrambled sequence that will not lead to the specific degradation of any known cellular mRNA. Fluorescein Conjugated Control siRNAs include: sc-36869, sc-44239, sc-44240 and sc-44241. Control siRNAs include: sc-37007, sc-44230, sc-44231, sc-44232, sc-44233, sc-44234, sc-44235, sc-44236, sc-44237 and sc-44238.

#### **RT-PCR REAGENTS**

Semi-quantitative RT-PCR may be performed to monitor Rho J gene expression knockdown using RT-PCR Primer: Rho J (m)-PR: sc-152855-PR (20  $\mu$ I). Annealing temperature for the primers should be 55-60° C and the extension temperature should be 68-72° C.
