**Additional info**

Anti-cytokeratin, low molecular weight (AE1) antibody labels acidic keratins K10, K14, K15, K16, and K19. Anti-cytokeratin (AE1) reactivity is seen in most normal and neoplastic cells of epithelial origin. Anti-cytokeratin (AE1) is a useful immunohistochemical reagent for distinguishing between poorly differentiated carcinomas and non-epithelial neoplasms.
