**Additional info**

Claudins are a family of over twenty proteins which are components of tight junctions. Tight junctions are specialized regions of cell-to-cell contact made up of a network of strands to act as a molecular 'gasket' for preventing the leakage of ions, water, etc., between cells.<sup>1</sup> Claudin 1 has been shown to distinguish epithelial neoplasms from lymphomas, making it a useful marker for nearly all carcinomas.<sup>2</sup>
