Application note: * The dilutions indicate recommended starting dilutions and the optimal dilutions or concentrations should be determined by the scientist. Storage instruction: For continuous use, store undiluted antibody at 2-8°C for up to a week. For long-term storage, aliquot and store at -20°C. Storage in frost free freezers is not recommended. Avoid repeated freeze/thaw cycles. Suggest spin the vial prior to opening. The antibody solution should be gently mixed before use. Background:

Images

Immunofluorescence: 293 cells transfected with N-terminal GST tagged gene. Cells were fixed with 4% paraformaldehyde for 30 min at RT, permeabilized with 0.1% Triton X-100 for 10 min at RT then blocked with 10% goat serum for 30 min at RT. Cells were stained with anti-GST tag

Western blot: 1) 2 µg of 293 cell lysates transfected with N-terminal GST tagged gene, 2) 2 µg of 293 cell lysates transfected with C-terminal GST tagged gene, 3) 10 µg of Mock 293 cell lysates stained with anti-GST tag antibody [SQab1886] at 1:10000 dilution, and 4) 20 ng of two fusion
