Additional info

CD15 is a carbohydrate antigen with the common trisaccharide structure 3-fucosyl-N-acetylglucosamine, also known as Lewis x (Lex) or stage-specific embryonic antigen 1 (SSEA-1).1-3 CD15 is expressed in myeloid cells and mediates neutrophil adhesion to dendritic cells.2-3 CD15 is also expressed in Reed-Sternberg cells and is thus a useful marker for identifying Hodgkin's lymphoma.
