Additional info

Mouse anti Human CD236 antibody, clone BGRL100 recognizes a 17 amino acid residue within the cytoplasmic domain of glycoporphin C (GPC), which has recently been designated CD236. CD236 is an integral membrane protein which carries the Gerbich blood group antigens. Expression of CD236 is not restricted to erythroid cells, but is broadly distributed in both erythroid and non-erythroid tissues.
