Additional info

Alpha Fetoprotein (AFP) is an oncofetal antigen of 70 kD found in body fluids, which if detected in high concentrations has clinical implications. AFP is expressed in fetal liver but is not present under normal circumstances in healthy adult tissues. It is reported to be expressed in a proportion of germ cell tumors, with high frequency in yolk sac tumors. Human alpha fetoprotein. Also reacts with pig and dog alpha fetoprotein. Does not react with mouse, rat, cat or cow alpha fetoprotein
