Biological Description

Description	JAK-2/3-IN-1 is a highly effective inhibitor targeting both JAK-2 and JAK-3 isoforms. It exhibits remarkable potency, with Ki values below 250 nM for both isoforms.
In vitro	The Janus kinases (JAK), comprising JAK-1, JAK-2, JAK-3, and TYK-2, are essential tyrosine kinases in cytokine signaling, with their downstream targets including signal transducer and activator of transcription (STAT) proteins. The JAK/STAT pathway is crucial in mediating various aberrant immune responses, including allergies, asthma, autoimmune diseases, and both solid and hematologic malignancies[1].
