BIMAX2 acetate

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance: no data available

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Biological Description

Description	BIMAX2 acetate is a high-affinity peptide for nuclear localization signals (NLS). It mimics the activity of classical NLS (cNLS) by competitively binding to importin α (importin alpha), thereby inhibiting the interaction between cNLS-cargo proteins and importin α . BIMAX2 acetate is utilized in research to explore the role of RBBP4 in regulating nuclear import efficiency and cellular aging.
