## EZ-Vac 96™ Vacuum Manifold

Perform high-throughput nucleic acid purification using a vacuum.

### Highlights

- Process up to 96 samples simultaneously without the need for repeated centrifugation steps.
- Compatible with the ZymoPURE™ 96 Plasmid Miniprep Kit.
- Eliminates the need to remove waste during nucleic acid purification.

<sup>1</sup> Operating a laboratory vacuum can present a significant safety hazard. Please read the instruction manual carefully before using the EZ-Vac 96™ Vacuum Manifold. Failure to do so may result in personal injury and/or property damage.

# Specifications

- **Capability** – The EZ-Vac 96™ Vacuum Manifold is capable of processing up to 96 samples simultaneously using 96-well vacuum plates and a vacuum source.
- **Compatibility** – The EZ-Vac 96™ Vacuum Manifold is compatible with ZymoPURE™ 96 Plasmid Miniprep Kit (Cat# D4214 and D4215). Please refer to the ZymoPURE™ 96 Plasmid Miniprep Kit instruction manual for more information regarding processing with the EZ-Vac 96™ Vacuum Manifold.
- **Required Equipment** – A single or double-staged vacuum pump capable of producing up to 300 mm Hg at the vacuum manifold and vacuum tubing with an internal diameter of about 1/4 of an inch (6.5 mm). A vacuum regulator is recommended to monitor and adjust the vacuum pressure in the vacuum manifold. Please contact Zymo Research Corporation if you have any questions regarding the suitability of your vacuum source.

## Product Description

The **EZ-Vac 96™ Vacuum Manifold** features durable chemical resistant construction and is designed for the high-throughput, rapid parallel purification of nucleic acid using the ZymoPURE™ 96 Plasmid Miniprep Kit. The vacuum manifold allows researchers to simplify their high-throughput nucleic acid purification workflows further by eliminating the need for multiple centrifugation steps and disposal of flow-through from collection plates. The unique manifold design also conveniently allows the filtrate and wash solutions to be collected in an external catch flask (not provided), eliminating the need for manifold disassembly and waste removal during the purification process.

**EZ-Vac 96™ Vacuum Manifold**

# Product Set-Up:

The EZ-Vac 96™ Vacuum Manifold is designed for use with Zymo Research products only. Use with other products/chemicals may result in personal injury and/or property damage.

Please refer to your specific kit's instruction manual for more information regarding compatibility and processing with a vacuum manifold.

1. Remove the **EZ-Vac 96™ Vacuum Manifold** and **Vacuum Inserts** from their packaging and inspect for damage. Do not use if any cracks are present.
2. Connect the vacuum manifold to a vacuum source, such as a house vacuum or vacuum pump using a vacuum hose. The vacuum hose can be attached to the vacuum manifold by inserting the vacuum insert into the vacuum port of either the manifold collar or manifold base.
3. Attach a catch flask and a vacuum regulator between the vacuum source and vacuum manifold. The catch flask will collect the column flow-through.
4. To adjust the vacuum pressure, turn off the vacuum pump and detach the vacuum hose from the vacuum insert on the manifold. Cover the now exposed end of the vacuum hose with your finger to create a vacuum seal within the tubing. Turn on the vacuum pump and adjust the knob on the vacuum regulator to the desired pressure. Turn off the vacuum pump.

*Your EZ-Vac 96™ Vacuum Manifold is now ready for use!*

# Product Care:

1. Always place the EZ-Vac 96™ Vacuum Manifold on a secure bench top or work area. Do not use the vacuum manifold if there are any cracks or significant abrasions.
2. Use caution and wear safety goggles when working near a vacuum manifold under pressure.
3. After use, turn the vacuum off and disconnect the vacuum hose from the EZ-Vac 96™ Vacuum Manifold.
4. Always clean and dry the EZ-Vac 96™ Vacuum Manifold after use to prevent damage. To clean, rinse all components with water and dry with paper towels.
5. If you have any questions regarding the performance or maintenance of your EZ-Vac 96™ Vacuum Manifold, please contact Zymo Research Technical Support<sup>1</sup>.
