# N6-(6-Aminohexyl)adenosine 2',5'-diphosphate lithium salt: sc-215521

# MATERIAL SAFETY DATA SHEET

# **1. PRODUCT AND COMPANY IDENTIFICATION**

Product Name:N6-(6-Aminohexyl)adenosine 2',5'-diphosphate lithium saltProduct Number:sc-215521

Supplier:	Santa Cruz Biotechnology, Inc.
	2145 Delaware Avenue
	Santa Cruz, CA 95060
	800.457.3801 or 831.457.3800
Emergency:	ChemWatch
	Within the US & Canada: 877-715-9305
	Outside the US & Canada: +800 2436 2255 (1-800-CHEMCALL) or call +613 9573 3112

# 2. HAZARDS IDENTIFICATION

# **Emergency Overview**

### **OSHA Hazards**

Target Organ Effect, Toxic by inhalation, Toxic by ingestion, Toxic by skin absorption, Irritant, Carcinogen Target Organs

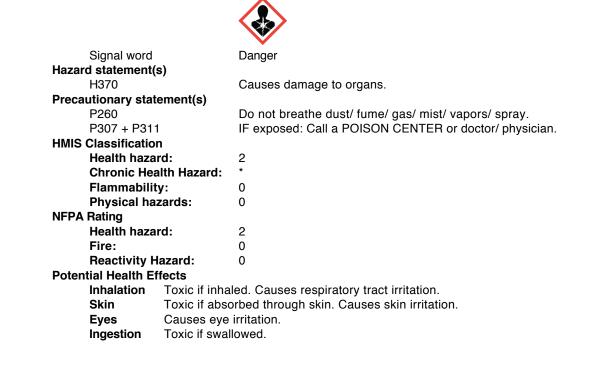

Eyes, Kidney, Liver, Heart, Nerves, Central nervous system

# GHS Classification

Specific target organ toxicity - single exposure (Category 1)

GHS Label elements, including precautionary statements

Pictogram

# **3. COMPOSITION/INFORMATION ON INGREDIENTS**

Formula : C16H28N6O10P2 · xLi+ Molecular Weight : 526.38

CAS-No.	EC-No.	Index-No.	<b>Concentration</b>

# 4. FIRST AID MEASURES

#### **General advice**

Consult a physician. Show this safety data sheet to the doctor in attendance.Move out of dangerous area. **If inhaled** 

If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician. In case of skin contact

Wash off with soap and plenty of water. Take victim immediately to hospital. Consult a physician.

#### In case of eye contact

Flush eyes with water as a precaution.

# If swallowed

Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.

# **5. FIREFIGHTING MEASURES**

#### **Conditions of flammability**

Not flammable or combustible.

Suitable extinguishing media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

# Special protective equipment for firefighters

Wear self contained breathing apparatus for fire fighting if necessary.

# Hazardous combustion products

Hazardous decomposition products formed under fire conditions - Carbon oxides, nitrogen oxides (NOx), Oxides of phosphorus, Lithium oxides

# 6. ACCIDENTAL RELEASE MEASURES

# **Personal precautions**

Use personal protective equipment. Avoid dust formation. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Avoid breathing dust.

#### **Environmental precautions**

Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

# Methods and materials for containment and cleaning up

Pick up and arrange disposal without creating dust. Sweep up and shovel. Keep in suitable, closed containers for disposal.

# 7. HANDLING AND STORAGE

# Precautions for safe handling

Avoid contact with skin and eyes. Avoid formation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust is formed.

# Conditions for safe storage

Keep container tightly closed in a dry and well-ventilated place. Store at -20 °C.

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION Components with workplace control parameters

Components	CAS-No.	Value	Control parameters	Basis			
Acetone	67-64-1	TWA	500 ppm	USA. ACGIH Threshold Limit Values (TLV)

#### Personal protective equipment

#### **Respiratory protection**

Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N99 (US) or type P2 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

#### Hand protection

Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

## Eye protection

Face shield and safety glasses Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

#### Skin and body protection

Complete suit protecting against chemicals, The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

# Hygiene measures

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

pН

# 9. PHYSICAL AND CHEMICAL PROPERTIES

Form	Solid
Melting point/freezing point	no da
Flash point	no da
Autoignition temperature	no da
Upper explosion limit	no da
Density	no da
Relative vapor density	no da
Odor Threshold	no da
Partition coefficient:	no da
n-octanol/water	

no data available no data available

Boiling point Ignition temperature Lower explosion limit Vapor pressure Water solubility Odor Evaporation rate no data available no data available

# **10. STABILITY AND REACTIVITY**

Chemical stability Stable under recommended storage conditions. Possibility of hazardous reactions no data available Conditions to avoid no data available Materials to avoid Strong oxidizing agents

#### Hazardous decomposition products

Hazardous decomposition products formed under fire conditions - Carbon oxides, nitrogen oxides (NOx), Oxides of phosphorus, Lithium oxides **Other decomposition products** 

no data available

# **11. TOXICOLOGICAL INFORMATION**

#### Acute toxicity

Oral LD50 no data available Inhalation LC50 no data available Dermal LD50 no data available Other information on acute toxicity o data available Skin corrosion/irritation no data available Serious eye damage/eye irritation no data available Respiratory or skin sensitization no data available Germ cell mutagenicity no data available Carcinogenicity IARC: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC. NTP: No component of this product present at levels greater than or equal to 0.1% is identified as a known or anticipated carcinogen by NTP. OSHA: No component of this product present at levels greater than or equal to 0.1% is identified as a carcinogen or potential carcinogen by OSHA. **Reproductive toxicity** no data available Teratogenicity no data available Specific target organ toxicity - single exposure (Globally Harmonized System) no data available Specific target organ toxicity - repeated exposure (Globally Harmonized System) no data available Aspiration hazard no data available Potential health effects Inhalation Toxic if inhaled. Causes respiratory tract irritation. Ingestion Toxic if swallowed. Skin Toxic if absorbed through skin. Causes skin irritation. Eves Causes eye irritation. Signs and Symptoms of Exposure To the best of our knowledge, the chemical, physical, and toxicological properties have not been thoroughly investigated. Syneraistic effects no data available Additional Information **RTECS:** Not available

# **12. ECOLOGICAL INFORMATION**

Toxicity					
no data available					
Bioaccumulative potential					
no data available					

Persistence and degradability no data available Mobility in soil no data available
