Wear protective gloves/protective clothing/eye protection/face protection.	
Avoid release to the environment.	
Wash thoroughly after handling.	
Do not eat, drink or smoke when using this product.	
Use only outdoors or in a well-ventilated area.	
If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with w	water/shower.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if	present and easy to do.
Continue rinsing.	
Immediately call a POISON CENTER/doctor.	
Specific treatment (see on this label).	
IF SWALLOWED: Call a POISON CENTER/doctor if you feel unwell.	
IF INHALED: Remove person to fresh air and keep comfortable for breathing.	
Wash contaminated clothing before reuse.	
If swallowed: Rinse mouth. Do NOT induce vomiting.	
Take off contaminated clothing and wash it before reuse.	
Store locked up.	
Dispose of contents/container in accordance with local/regional/national/international	l regulations.

#### 4 First-aid measures

- · Description of first aid measures
- · General information:
- Immediately remove any clothing soiled by the product.

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

• After inhalation:

Supply fresh air. If required, provide artificial respiration if trained to do so. Keep patient warm. Consult doctor if symptoms persist.

In case of unconsciousness place patient stably in side position for transportation.

- · After skin contact: Immediately wash with water and soap and rinse thoroughly.
- · After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- After swallowing:
- Rinse mouth
- DO NOT induce vomiting.
- Information for doctor:
- · Most important symptoms and effects, both acute and delayed No further relevant information available.
- · Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

#### 5 Fire-fighting measures

- Extinguishing media
- · Suitable extinguishing agents:
- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. • Special hazards arising from the substance or mixture

Products of thermal decomposition of this material would include hydrogen cyanide, ammonia, and oxides of carbon, nitrogen and sulfur.

- · Advice for firefighters
- · Protective equipment: Wear self-contained breathing apparatus for fighting fires involving this material

### 6 Accidental release measures

Personal precautions, protective equipment and emergency procedures	
Wear self-contained breathing apparatus for responding to non-incidental release of this material in	which there is
the potential for inhalation of vapors, mists or sprays	
Wear protective equipment. Keep unprotected persons away.	
· Environmental precautions:	
Dilute with plenty of water.	
Do not allow to enter sewers/ surface or ground water.	
• Methods and material for containment and cleaning up:	
Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).	
Use neutralizing agent.	
Dispose contaminated material as waste according to item 13.	
Ensure adequate ventilation.

#### 7 Handling and storage

- · Handling:
- · Precautions for safe handling

Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols.

- · Information about protection against explosions and fires: No special measures required.
- $\cdot$  Conditions for safe storage, including any incompatibilities
- Store in cool, dry place. Store in well-ventilated location.

· Storage:

- · Requirements to be met by storerooms and receptacles: No special requirements.
- · Information about storage in one common storage facility: Do not store together with acids or strong oxidizers
- Further information about storage conditions: Keep receptacle tightly sealed.
- · Specific end use(s) Laboratory reagent

#### 8 Exposure controls/personal protection

- Additional information about design of technical systems: No further data; see item 7.
- · Control parameters

Work under a chemical fume hood when using this product. Ensure eyewash station and safety showers are readily accessible.

· Components with limit values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

- · Additional information: The lists that were valid during the creation were used as basis.
- · Exposure controls

The appropriate protective equipment under anticipated circumstances of use include lab-coat, safety glasses with side-shields and gloves.

- · Personal protective equipment:
- *General protective and hygienic measures:* Keep away from foodstuffs, beverages and feed.

### 10 Stability and reactivity

- · *Reactivity* No further relevant information available.
- · Chemical stability This product is normally stable under anticipated circumstances of use and storage.
- Thermal decomposition / conditions to be avoided:
- Products of thermal decomposition of this material would include hydrogen cyanide, ammonia, and oxides of carbon nitrogen and sulfur.
- · Possibility of hazardous reactions No dangerous reactions known.
- · Conditions to avoid Avoid exposing product to extreme temperatures or incompatible chemicals
- · Incompatible materials: Acids and strong oxidizers
- · Hazardous decomposition products:

Product will not undergo self-decomposition, so no such products will be generated.

#### 11 Toxicological information

- · Information on toxicological effects
- Acute toxicity:

#### · LD/LC50 values that are relevant for classification:

#### CAS: 593-84-0 guanidinium thiocyanate

- Oral LD50 593 mg/kg (rat)
- · Primary irritant effect:
- on the skin: Caustic effect on skin and mucous membranes.
- · on the eye: Strong caustic effect.
- · Sensitization: No sensitizing effects known.
- $\cdot$  Additional toxicological information:
- The product shows the following dangers according to internally approved calculation methods for preparations: Harmful
- Corrosive

Swallowing will lead to a strong caustic effect on mouth and throat and to the danger of perforation of esophagus and stomach.

· Carcinogenic categories

· IARC (International Agency for Research on Cancer)

None of the ingredients is listed.

· NTP (National Toxicology Program)

None of the ingredients is listed.

· OSHA-Ca (Occupational Safety & Health Administration)

None of the ingredients is listed.

### 12 Ecological information

· Toxicity

- · Aquatic toxicity:
- CAS: 593-84-0 guanidinium thiocyanate

EC50 42.4 mg/kg (daphnia)

- · Persistence and degradability No further relevant information available.
- · Behavior in environmental systems:
- · *Bioaccumulative potential* No further relevant information available.
- · Mobility in soil No further relevant information available.
- · Additional ecological information:
- · General notes:
- Water hazard class 2 (Self-assessment): hazardous for water
- Do not allow product to reach ground water, water course or sewage system. Must not reach bodies of water or drainage ditch undiluted or unneutralized.
- Danger to drinking water if even small quantities leak into the ground.
- · Results of PBT and vPvB assessment
- *PBT*: Not applicable.

## 13 Disposal considerations

· Waste treatment methods

· Recommendation:

Dispose of contents in accordance with local/regional/national, and international recommendations.

· Uncleaned packagings:

· Recommendation:

Dispose of container in acoordance with local/regional/national and international recommendations.

• *Recommended cleansing agent:* Water, if necessary with cleansing agents.
